Understanding how to balance natural, social, and economic systems has become increasingly important for helping you reach your career goals and become an effective leader in business, government, and nonprofit organizations.

Students who graduate with a Master of Science in Sustainable Management can expect to have a strong foundation for leading change in their current organizations or building new careers that require systems-thinking skills.

Designed for working adults with real-world experience, this online master’s degree program offers flexibility to help students balance family, job, and other commitments.

Online Course Details

The 14-course (34 credit) online Sustainable Management master’s program is a collaborative effort of University of Wisconsin - Extension, UW-Green Bay, UW-Oshkosh, UW-Parkside, UW-Stout, UW-Superior. Current, innovative curriculum has been developed by faculty from each of these five campuses with input from within the industry to make sure our learning objectives are current and valuable to future employers.

The program consists of core courses, specialty track options, and a Capstone experience:

Required Core Courses (24 credits)
- Cultural and Historical Foundations of Sustainability
- The Natural Environment
- Applied Research and the Triple Bottom Line
- Policy, Law, and the Ethics of Sustainability
- Economics of Sustainability
- The Built Environment
- Geopolitical Systems—Decision Making for Sustainability on the Local, State, and National Level
- Leading Sustainable Organizations
