A major in Sustainable Management gives students the knowledge and the skills needed to help build profitable businesses, contribute to vibrant communities, and support a healthy environment. The curriculum includes courses that will help students gain a comprehensive understanding of the ways in which natural processes, business structures, and social needs intersect. Here are just a few examples of courses:

- System Thinking
- Economics in Society and Sustainability
- Ecology of Sustainable Management
- Environmental and Sustainability Policy
- Triple Bottom Line Accounting for Managers
- Sustainable Organizational Finance
- Management and Environment Information Systems
- Logistics, Supply Chain Management and Sustainability
- Organizational Behavior and Sustainability
- Environment and Society

The following Sustainable Management certificate programs are also offered completely online:

- Sustainable Management Science Certificate
- Sustainable Enterprise Management Certificate

Career Possibilities

Graduates of the Sustainable Management program have found careers as:

- Sustainability specialist
- Sustainability consultant
- Solar operations surveyor
- Energy and LEED analyst
- Social compliance analyst
- Zero-waste program manager
- Renewable energy analyst
- Sustainable design coordinator
- Environmental analyst

**Program Highlights**

The 63-credit comprehensive major is offered in collaboration with UW-Parkside, UW-River Falls, UW-Stout and UW-Extension. The Sustainable Management degree is offered entirely online, providing you with:

- **Quality**: Taught by the same distinguished University of Wisconsin faculty who teach classroom courses.
- **Flexibility**: Online learning means studying when and where it is convenient for you.
- **Student Support**: Advisors provide support and understand your needs.
