## Art, Music, & Physical Education Majors

### The Teacher Education Program

UW-Superior's teacher education program offers three K-12 education majors that prepare students to teach pupils from early childhood through the adolescent level in the special areas of physical education, art, or music.

Our teacher education program offers a challenging curriculum, small class sizes, intensive interaction with faculty and many opportunities to gain experience by working with children on campus, in classrooms and as a student teacher or teaching intern. The program prepares students for licensure in Wisconsin, and the degree is acceptable in many other states.

UW-Superior has more than 100 years of experience in training teachers. Our teacher education program enjoys an excellent reputation for quality and innovation. Our graduates are highly regarded by their employers, and many have won teaching awards at the district, state and national levels.

### Art, Music, & Physical Education Majors

K-12 education students complete a comprehensive major in the academic subject in which they wish to teach as well as a set of teacher education courses to gain classroom skills and experiences. Students can earn either a:

- Bachelor of science in art education
- Bachelor of science in physical education
- Bachelor of science in music education

Students begin working with children early in their academic careers and have many opportunities to observe, tutor and teach small and large groups before their student teaching experience.

### Graduate Possibilities

After earning their bachelor's degree, students can continue their education and professional growth throughout their careers with our high-quality graduate programs in:

- Instruction
- Special education
- Counseling
- Educational administration - principal
- Educational administration - superintendent
- Educational administration - director of special education/pupil services
- Educational administration - director of instruction

Teaching is both an exciting and rewarding profession. If you have been called to teach, you already know the joy of seeing that "aha" moment as a result of working with a child. Learn how you can make a difference in the lives of those you teach. Learn how to combine your passion for working with young people with the knowledge and skills of your favorite subject areas.
