Dear Campus Community,

I want to inform you of a development in our Twin Ports area regarding COVID-19. We have learned that there is a confirmed case of coronavirus in Douglas County. Douglas County Public Health states that the individual likely contracted COVID-19 during travel, and that they are isolated at home and doing well.

The campus remains on minimal staffing and most employees are already telecommuting.

We are actively communicating to our students who are away on spring break and advising them not to return to campus. While we are working to minimize the number of students on campus, there are provisions to serve and protect those who need to remain here. All residential students away on spring break are asked to communicate with residence life at reslife@uwsuper.edu about their plans immediately. Residence life is providing case-by-case consultation to students about their needs.

Our emergency response team is in regular contact with Douglas County Public Health Services to determine immediate and future safeguards for our campus. Douglas County Public Health Services coordinates with their counterparts across the bridge, and throughout the region and state.

Should the situation change, we will be sure to get information out. We remain fully committed to serving our campus in these difficult times. For ways to safeguard you and your family, please visit www.uwsuper.edu/coronavirus.

Renée
