Emergency Supply Checklist

When disaster strikes, immediate help may not be available. Every household should have an emergency kit with enough supplies to see you through three days following a natural disaster or terrorist attack. The checklist below includes basic items that every kit should include. You may need to supplement this list with additional items based on where you live, the type of potential disasters you might face and the unique needs of your family. You should also consider having at least two emergency supply kits: one complete kit at home and a more portable kit at your workplace or in your vehicle. Include the following in your home kit:
