SOAR and Weekend of Welcome Registration

All incoming students with 21 or fewer post-high school credits are required to attend Summer Orientation, Advising, and Registration (SOAR). SOAR will be a full day of information about resources on campus, what to do next, connect with current students, and by the end of the day, each student will have registered for classes. You must attend the entire day of SOAR. Students can register for SOAR at uwsuper.edu/fye/orientation/index.cfm.

Weekend of Welcome (WoW) is a very exciting time of the year and is an awesome way for students to better transition into college by attending events, meeting current students as well as incoming students, attend the induction ceremony, participate in Jacket Smash, and have a great time. To see the schedule and register for Weekend of Welcome, visit uwsuper.edu/fye/wow/index.cfm.

Placement Testing

All incoming freshmen for Fall 2015 are required to take a math placement test, and are strongly encouraged to take English and foreign language placement tests. You may be required to take English and foreign language tests based on certain parameters — please review the testing website below for these requirements. Placement tests must be completed at least two weeks prior to your student’s SOAR date. For more information about Wisconsin Placement Testing, please visit uwsuper.edu/support/testing/uw-placement.cfm.

Living-Learning Community (LLC)

Intended specifically for new freshmen, the LLC is a select group of students who live together in a residence hall, explore majors and careers, attend two common courses together, and have access to special resources and activities. The LLC integrates both in and out of classroom learning, and helps lay the foundation for students’ success in college. There is no additional cost to be part of the LLC.

We would love to speak with you about the advantages of being part of the LLC — please email us or give us a call. You can also find more information about the LLC at uwsuper.edu/fye/living-learning-communities.cfm.
