Learn@UWSuperior Class Progress and User Progress

Class Progress

Class Progress was introduced in the version 10.0 upgrade. Class Progress has a “dashboard” display similar to the User Progress screen. Each course can have 4 indicators to check the class progress in - Checklist, Content, Discussions, Dropbox, Grades, Login History, etc. You can change the indicators as needed through the Settings link.

User Progress

You can access the User Progress screen through the Class Progress screen by clicking on a student’s name or through the Classlist using the dropdown menu next to a student’s name and selecting View Progress. User Progress was redesigned in version 10.0, there is now a “dashboard” view that will summarize the students’ activities in all the tools as well as individual screens.

You can restrict the time period you view to the last 7 days, the last 30 days, or all time. The revision also made it easier to print if you need a paper copy of the progress to show your students.

The individual tools are listed in the left hand column, when you select one of them you will see the progress the student has made up to that point of the semester. You can click on the Details link to find more information on the student’s activities.
