Viewing Your Submission Results after Taking the Quiz

Some instructors will allow you to see the answers after you have submitted a quiz. You may be able to see all of the answers, the ones you answered correctly, or the ones you answered incorrectly.

1. In the course you want to see your submission results in, click on the Assessment dropdown menu and select Quizzes from the list.

2. In the Quizzes area of the course you want to see the submission results for, click on the dropdown menu to the right of the quiz name and select Submissions from the list.

3. On the Submissions screen for the quiz, you will see your score (blue box on right) as well as the link to view the quiz attempt itself (red box on left). Click on the Attempt link.

4. The Attempt View screen will show whatever information your instructor has allowed. Some might show all the questions (including the answers) and others might only the questions you got wrong/right. This example shows the questions answered wrong (blue boxes).

5. If your instructor has given comments for the question, click on the View Feedback link to see it.

6. Once you have finished looking over the Attempt View, click on the Close button to return to the Quiz Submission screen.
