Disable Pop-up Blockers for Learn@UWSuperior

It is recommended that pop-up blockers are turned off while navigating through the Learn@UW-Superior pages, since many tools use pop-ups.

1. To turn off your pop-up blocker you must first find the internet browser navigation bar item called Tools. It is usually toward the top left of the screen.

2. Click Tools and scroll down to Pop-up Blocker. If there is an arrow pointing to the right, move your mouse pointer over laterally until more options appear. Turn Off Pop-up Blocker and Pop-Up Blocker Settings will appear.

3. Click Turn Off Pop-up Blocker to disable it for all sites or click Pop-up Blocker Settings to manually select which sites the Blocker will be disabled.

If you have another toolbar or search bar sponsored by a certain company or search engine such as Google or Yahoo, you may have another pop-up blocker provided by the company. They will often have a menu where the above steps can be performed to disable the pop-up blocker. Often there is a setting for allowing pop-ups only within certain sites.
